

The Lakeland area residents have had access to medical helicopters since 1985. Howard Young Medical Center moved their helipad from the commercial side of the hospital to the residential side near the emergency room in 2011, allowing for a time savings of 5 minutes. The current service is not at issue and is not related to the conditional use permit.

The conditional use permit is requesting to move the base hangar from the airport in Rhinelander to a residential neighborhood in Woodruff. There are only 4 helicopter hangars based at hospitals in the State of Wisconsin and they are not in residential neighborhoods. If this occurs, the traffic increases from 100 local emergency flights to 375 feeder flights, with a possibility of a greater increase over time.

Oneida County Zoning Board, please vote "No" on the HYMC C.U.P. for the following reasons:

1. Per section 6 of the permit application:
 - a. Comfort: Decibel levels of small helicopter are 85 per the test done at HYMC. A snowmobile is ticketed at that level. The larger helicopter was not tested and has a much louder blade slap vibration.
 - b. Property values: values of homes in the area surrounding the hangar will most likely decrease.
 - c. Improvements: Two home owners on Spruce/Larson have stated that they will not improve their property- one related to replacing garage and the other choosing not to build a home on the land.
 - d. Safety: concerns with addition of a 12,000 gallon fuel tank and the congested sight with trees, buildings.
 - e. 375 flights x 2 for basing the helicopter: Helicopters are aircraft and belong in wide open areas.
 - f. The emergency needs are already met with the helipad placement near the emergency room, which occurred without being required to permit so no public input. 100 flights x 2 has been tolerated because they have been emergencies.
 - g. The addition of a helicopter to a residential

Compromise is sought. Howard Young Medical Center has been asked to evaluate two alternate locations: the Lakeland Airport in Arbor Vitae, 2 minutes away via air or the east side of the hospital where the original helipad is located.

 - a. Comfort: Decibel levels of small helicopter are 85 per the test done at HYMC. A snowmobile is ticketed at that level. The larger helicopter was not tested and has a much louder blade slap vibration.
 - b. Property values: values of homes in the area surrounding the hangar will most likely decrease.
 - c. Improvements: Two home owners on Spruce/Larson have stated that they will not improve their property- one related to replacing garage and the other choosing not to build a home on the land.
 - d. Safety: concerns with addition of a 12,000 gallon fuel tank and the congested sight with trees, buildings.
 - e. 375 flights x 2 for basing the helicopter: Helicopters are aircraft and belong in wide open areas.
 - f. The emergency needs are already met with the helipad placement near the emergency room, which occurred without being required to permit so no public input. 100 flights x 2 has been tolerated because they have been emergencies.
 - g. The addition of a helicopter to a residential

Compromise is sought. Howard Young Medical Center has been asked to evaluate two alternate locations: the Lakeland Airport in Arbor Vitae, 2 minutes away via air or the east side of the hospital where the original helipad is located.

(WR 512 - 822-24 2nd Ave)

The Lakeland area residents have had access to medical helicopters since 1985. Howard Young Medical Center moved their helipad from the commercial side of the hospital to the residential side near the emergency room in 2011, allowing for a time savings of 5 minutes. The current service is not at issue and is not related to the conditional use permit.

The conditional use permit is requesting to move the base hangar from the airport in Rhinelander to a residential neighborhood in Woodruff. There are only 4 helicopter hangars based at hospitals in the State of Wisconsin and they are not in residential neighborhoods. If this occurs, the traffic increases from 100 local emergency flights to 375 feeder flights, with a possibility of a greater increase over time.

Oneida County Zoning Board, please vote "No" on the HYMC C.U.P. for the following reasons:

1. Per section 6 of the permit application:
 - a. Comfort: Decibel levels of small helicopter are 85 per the test done at HYMC. A snowmobile is ticketed at that level. The larger helicopter was not tested and has a much louder blade slap vibration.
 - b. Property values: values of homes in the area surrounding the hangar will most likely decrease.
 - c. Improvements: Two home owners on Spruce/Larson have stated that they will not improve their property- one related to replacing garage and the other choosing not to build a home on the land.
 - d. Safety: concerns with addition of a 12,000 gallon fuel tank and the congested sight with trees, buildings.
 - e. 375 flights x 2 for basing the helicopter: Helicopters are aircraft and belong in wide open areas.
 - f. The emergency needs are already met with the helipad placement near the emergency room, which occurred without being required to permit so no public input. 100 flights x 2 has been tolerated because they have been emergencies.
